

# Dishwasher Tablets

## Technical Bulletin

Page 1 of 1

Issue Date: April 2015

### Description and Use

Dishwasher Tablets are phosphate free tablets designed for use in domestic dishwashers in homes, child care centres, aged care facilities and cafes.

### Features and Benefits

Dishwasher Tablets are low alkalinity dishwasher tablets containing activated oxygen bleach and enzymes to enhance cleaning performance. The low alkalinity means it is safe on all types of crockery and for use with septic systems.

Dishwasher Tablets are packaged in cartons containing 30 tablets in blister packs. They also contain an anti ingestion agent as a protection against ingestion.

Dishwasher Tablets contain a built in rinse aid surfactant that enhances the shine in the final rinse

Dishwasher Tablets have a high level of non phosphate sequestrants to control scale keeping the dishwasher sparkling clean.

### How to Use

In domestic dishwashers add 1 tablet to the dispenser. Push tablet out of blister pack directly into dispenser to avoid skin contact. If no dispenser is fitted place on cutlery basket.

### Technical Data

Dishwasher Tablets are alkaline tablets containing water softening agents, corrosion inhibitors, alkaline builders, low foam biodegradable surfactants, protease (for protein) and amylase (for starch) enzymes and an activated oxygen bleach. They have a pH of 10.5 at a 1% concentration
